

First Announcement / Call for Papers

CSST 2026

2026 China Symposium on Sustainable Ironmaking and Steelmaking Technology

November 3-5, 2026

Nanjing, Jiangsu Province, China

Organized by

The Chinese Society for Metals

Co-organized by

上海大学
Shanghai University

Shanghai University

University of Science &
Technology Beijing

Conference Website: www.csst2026.com

General Information

It is our pleasure to inform you that 2026 China Symposium on Sustainable Ironmaking and Steelmaking Technology (CSST2026) will be held in Nanjing, Jiangsu Province, China on November 3-5, 2026.

After rapid development for nearly 30 years, the world steel industry has entered a new period. Further increasing steel production is no longer the priority of the steel industries in major steel production countries. The R&D works has been shifted to focus on the technologies for sustainable development, i.e. technologies for ever enhancing production efficiency, making steels with ever higher properties, more friendly to environment, providing ever better services for customers, etc.

To promote the exchange of the metallurgical technologies in the steel industry in this new period, The Chinese Society for Metals (CSM) launched and organized an international symposium entitled “China Symposium on Sustainable Steelmaking Technology” in 2018, and the contents of ironmaking was added into the 2nd CSST in 2021, which received highly positive responses from the metallurgical industries and academies.

CSST 2026 will provide an excellent venue for the academia, researchers and engineers all around the world to exchange state-of-the-art development and information on the issues related to ironmaking and steelmaking. We kindly invite you to participate in this meaningful symposium and are looking forward to meeting you in Nanjing in the golden autumn in 2026 - the best season of the city.

Topics

The topics of CSST2026 include, but are not limited to:

- Metallurgical Technologies for Steels with Enhanced-Quality, High Performance and High Efficiency
- Recycling of Metallurgical Resources in Ironmaking and Steelmaking Process
- Technologies for Controlled and Reduced Emissions in Iron and Steel Production
- New Technologies & Processes in the Fields of Ironmaking and Steelmaking under the Carbon Peak and Carbon Neutrality Circumstances
- Metallurgical Technologies with Long-Life and Reducing in Iron and Steel Production

Organized by

The Chinese Society for Metals (CSM)

Co-organized by

Shanghai University

University of Science & Technology Beijing

Conference Structure

Honorary Chairman

Xinhua Wang, University of Science & Technology Beijing

Conference Chairmen

Jian Yang, Shanghai University

Jianliang Zhang, University of Science & Technology Beijing

Organizing Committee

Chairman:

Xinjiang Wang, The Chinese Society for Metals

Secretary General

Tongsheng Zhang, Shanghai University

Deputy Secretary General

Min Jiang, University of Science & Technology Beijing

Zhengjian Liu, University of Science & Technology Beijing

Kejiang Li, University of Science & Technology Beijing

Abstract Submission

All contributions on the theme of the conference as described previously are welcomed. Prospective authors are invited to submit an abstract of 300 words (in English) by **May 1, 2026** through the conference website: www.csst2026.com. The abstract should provide sufficient information for a fair assessment.

Official Language

Official language for the conference is English.

Sponsorship Opportunities

In conjunction with CSST2026, The Chinese Society for Metals would like to invite you as a plant manufacturer and plant supplier in the field of ironmaking and steelmaking to actively participate in our symposium.

It is estimated that many experts in the steel industry from all over the world will participate in CSST2026.

Your contribution and participation will help us make the symposium a successful event.

You should not miss this opportunity to promote new products, outline services and highlight key achievements to the delegates of CSST2026. This is an excellent opportunity to do business and maintain key contacts with customers and suppliers.

Companies interested in becoming a sponsor are kindly requested to send an email to the conference secretariat (csst2026@csm.org.cn).

Conference Secretariat
